

MISSOURI DEPARTMENT OF TRANSPORTATION SINGLE FEASIBLE SOURCE

The Missouri Department of Transportation, General Services Unit, has determined that only one source can provide the Department with maintenance and repair for their three (3) Uninterruptible Power Supply (UPS) using flywheel technology, with micro switch, line-interactive capability employing less than a millisecond of power interruption, for buildings located in the Jefferson City area. Purchases relating to this system may exceed \$25,000 individually and/or cumulatively and may be made annually, with up to four (4) one-year renewal option. A contract to purchase the above described services may be executed with Fabick Power Systems, Inc., Fenton, Missouri. To our knowledge, Maintenance And Repair Services for the above described UPS cannot be acquired from any other source.

Issues with this contractual agreement may be directed to Clayton Hanks, CPPO, C.P.M. at 573-522-9565 or [Clayton.Hanks@modot.mo.gov](mailto:Clayton.Hanks@modot.mo.gov). The closing date for this service agreement is October 3, 2006, at 2:00 p.m. local time.
